

Half of maternal deaths are preventable.

Save lives by teaming up with AIM.

AIM is an open access collaborative program dedicated to saving women's lives. AIM provides hospitals and states with the tools and support they need to prepare for and respond to obstetric emergencies.

We can reduce maternal mortality and morbidity if we work together and use the evidence-based knowledge, timely data, and reliable resources that AIM provides.

Benefit by teaming up with AIM.

When you team up with AIM you will receive Patient Safety Bundle implementation support, training, peer-to-peer engagement opportunities, and access to AIM's national data center to track your success.

AIM-supported Patient Safety Bundles include:

[Obstetric Hemorrhage](#)

[Severe Hypertension in Pregnancy](#)

[Maternal Prevention of VTE](#)

[Safe Reduction of Primary Cesarean Birth](#)

Let's do this together!

When people committed to solving problems come together, something wonderful happens.

[Contact us](#) to learn how to get involved with AIM and save lives in your hospital or state.

The U.S. maternal death rate has more than doubled in the past 25 years. The good news: there is a solution.

safehealthcareforeverywoman.org/aim

AIM is funded by Grant #UC4MC28042 through a cooperative agreement with the Maternal and Child Health Bureau (MCHB) and Health Resources & Services Administration (HRSA). AIM core partners include:
